

Halogen Lightbar

Description of Halogen Lightbar

The halogen lightbars cover is made of polyester material, which has a high hardness and a strong resistance against impact. After the cover is coated for protection, the cover's bright color will not fade away. The cover boasts a superior tightness, with a protection index over Ip65, which is an advanced level all over the world. It is also equipped with a unique system. Our halogen Lightbar boasts a novel, beautiful and secure design and it perfectly combines strobe lights, rotating lights, flash lights and many other light sources. Halogen lightbar's turn lights adopt the internationally advanced transmission structure, with a low degree of wear and little noise. It is easy to replace the lamps and the reflector of rotating lights possesses a reasonable light distribution curve. The universally popular two-way reflectors are used to effectively increase the utilization rate of the light source. We offer red halogen lightbar, blue halogen lightbar, and amber halogen lightbar for your choice.

Parts of Halogen Lightbar

Turn lights: Turn lights are operated by rubber wheel, which is an advanced technology in the world. There is little noise, no untouchable points. The rotating speed of the parts of rotating lights inside is 80-140t/min.

Light source: The light bulbs are high-quality halogen bulbs with a brightness > 800Lx, and longevity >1000 hours.

Light controller: The main light source and the secondary light source control the halogen lightbar separately with a two-way light controller. The front and back light sources can be selected to control the halogen lightbars by the switches. You can also choose the light controller within the siren.

Speaker: 80W, 100W, 150W can be chosen

Modules: Six modules can output its own insurance to increase the security. Completely sealed, moisture proof and waterproof, Japanese capacitors, a stable capacity, no need to maintain, no disturbance from frequency.

Cover: The cover is made of polyester material, no deformation, unbreakable, a strong resistance against impact. The cover surface is coated, leading to a bright color that does not fade. Hardness > 4H, transparency over 9, not easily fading.

Lamps: High-quality pulse xenon lamps imported from Germany, used over 50 million times. No machinery wear, no noise, a high lighting efficiency, resisting background light, a strong capability of penetrating fog.

Supporting tripods: They have horizontal adjustable movable tripods, applicable to police cars with different roofs; the pitch of fixation is 90-130cm.

The lighting effect and the color setting: The saturation of the main and secondary halogen lightbar can choose red, yellow and blue horns according to the clients' demands.
